PREFACE

This Mission Coverage Index (MCI) furnishes a listing of intelligence targets covered by aerial photographic material from CHURCH DOOR [REDACTED] [REDACTED] dated 9 May 1963 [REDACTED]

25X1D

25X1C

25X1C [REDACTED] The listing provides the latest description based on photographic interpretation for each target covered by the Mission except for those targets in which no significant change was noted. Items in the listing are arranged by (1) Country (2) WAC area within the country and (3) coordinates reading from south to north and from west to east. An explanation of column headings and photo reference data used in presenting the information is contained in the appendix.

For convenience of the user, a subject index to the intelligence targets has been included following the listing. Targets in the subject index are listed (1) by category (2) by country within the category and (3) alphabetically by place name within each country.

25X1D

25X1D [REDACTED] The user of this MCI is cautioned that the scan of photography from [REDACTED] was accomplished in a relatively short time and often without the aid of precise analytical and mensural techniques commonly employed in detailed photographic analysis. Consequently, although the information presented herein is essentially accurate, additional, detailed analysis may somewhat alter portions of the information.

APPENDIX
EXPLANATION OF COLUMN HEADINGS
AND PHOTO REFERENCES

City, Installation-- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. Where appropriate, the city and installation names are followed by a capsule description.

Coordinates-- Coordinates are referenced to the SW corner of the minute square. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC-- This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Installation Numbers-- The Installation Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is an NPIC target number 0289-1 and an NPIC target number 0290-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.

The photo reference indicates frame (s) on which the target appears and conditions which affect interpretation of the target.
